Summary

I am a full-stack engineer who wants to help as many people as possible with coding. My background isn't anything technical, but I think with my psychology and service-oriented work background I can be useful as a full-stack engineer. I am looking for a company that will challenge me daily to be a better person and developer; while also helping others with their product.

Skills

Front-End: JavaScript ES6, HTML5, CSS3, jQuery, React

Back-End: Node.js, Express, PostgreSQL

Additional Skills: Git, GitHub, Enzyme, RESTful APIs, Unit Testing, Jest, Mocha, Chai, Supertest

Recent Projects

Community Artist Application | <https://community-artist-app.now.sh/>

- This application is a start to help bridge a gap between the art community and other communities. This application will allow you to upload images to a database and view said images.
- Tech: HTML5, CSS3, JavaScript ES6, React, Node.js, Express, PostgreSQL, Jest, Mocha, Chai, and Supertest

Space Exploration | <https://github.com/logantheproblemsolver/SpaceExploration>

- Gave the ability to users to explore space without leaving their house! This site allows people to look up NASA's picture of the day and accompanying YouTube videos, as well as lookup space search terms that come with pictures and youtube videos.
- Tech: HTML5, CSS3, JavaScript ES6, jQuery, and RESTful API's

Experience

Mobile Tech Service Advisor, Rush Enterprises

May 2017 - August 2019

- Facilitated successful customer relations in the highest volume branch in North Carolina
- Demonstrated excellent time-management by reducing the repair timeline of fifty trucks to two weeks
- Coordinate between the customer and mobile technician to schedule appointments
- Prepare the technician to be fully capable of completing the task at hand

Logistics & Communications Coordinator, HR Science Research Team

August 2017 - May 2018

- Coordinated conference dates, lodging, and transportation for approximately forty team members
- Communicated with team members regarding general and executive team updates
- Distribute articles to the whole research team before meetings

Scheduling Coordinator, Beans 2 Brew

August 2016 - January 2018

- Managed shift scheduling for a non-profit coffee shop with approximately 300 volunteers
- Collaborated to create a comprehensive Organizational Chart to assist in succession planning
- Communicated daily and weekly updates to volunteers, ensuring up-to-date information was conveyed
- Partnered with internal and external individuals to successfully transition to a 501c3 organization

Education

Thinkful

April 2020

Engineering Flex program

- Learned industry best practices and practical software development standards with a focus on HTML5, CSS3, JavaScript, jQuery, Node.js, React, Redux, and algorithms & data structures.

Appalachian State University

Bachelors of Science in Psychology, General Business Minor

May 2018
